

PROJECTED NUMBER OF MALNOURISHED CHILDREN IN FREE WORLD DEVELOPING COUNTRIES 1966-1975 *

(millions of children)

 Age group 7-14
 Age group 0-6

* All data are rough estimates. Extrapolation from data provided by Dr. Jessup, AID -- Estimated by Dr. Ghulhati, Population Reference Bureau.

△ Seriously malnourished children are considered to be those who have a growth retardation equal or greater than 20% of the norm for their country. The percentage of total age group used are believed to be conservative.
